Monita: Andre, you did not join the trip to Lestari National Park, did you?

Andre: No. I had a stomach ache.

Monita: Oh, I'm sorry to hear that. So, how are you doing now?

Andre: I'm ok now, thanks. So, tell me about the excursion.

Monita: At the park, I went to six different areas to see different kinds of plants. Let me show you my photos. First, I went to a dedication area.

Andre: You said dedication area. What's that?

Monita: That is the area where important people planted some trees there. Interestingly, I saw a tree with a unique name. People call it Tampar Hantu.

Andre: The name sounds scary. What about the second area you visited?

Monita: I visited the limited plants area.

Andre: What did you see there?

Monita: I saw some endangered trees from Kalimantan. I saw pohon ulin there. People sometimes call it kayu besi.
